## SMARTRACK GLOBAL GPS TRACKING SYSTEM

### — Purpose:

This system is used to track equipment across the globe.

### — Capabilities:

The system can track vehicles, humans, and equipment across the globe on a cloud based platform. Track every step, turn and twist of an asset using our integrated GPS tags powered by the 3Arc platform. The system allows for silent and on demand location services tracking. The system can provide accurate location services around the globe, travel history, driving performance, fuel usage, speed warnings and many other services. The GPS tracker directly integrates with the SMARTRACK asset tracking system for comprehensive asset management.

### — Best For:

Tracking items across the globe, land navigation courses, air field operations, container tracking, human tracking and critical asset location tracking.
